Where Building
Beautification & Creativity
Matters

Luxture Surface Coatings Pvt. Ltd. is an ISO 9001:2015 certified company and developer of innovative coatings in India for relishing the dreams of house owners. Luxture Surface Coatings Pvt. Ltd. was incorporated in the year 2003 with exclusive range of European, Italian and Japanese, textured & decorative paints, with multicolored and special effects. The company is managed by a group of technocrats and professionals. We emphasized on investing in continuous research and developments and bringing new ideas in the form of new products.

Build on the foundation of our business creed "Sincerity and Creativity" we will pursue the infinite possibilities for development and creation in building beautification Product. By creating innovative products, which bring a sense of satisfaction to people we intend to meet and exceed your expectations.

Luxture's philosophy is "Quality Must and Never be Compromised". So following this philosophy company is manufacturing different quality products which are long lasting and durable with distinct look and feel at affordable price.

Luxture's vision is "Innovation of new Ideas", keeping this vision in mind we are relishing the dreams of house owners with our breathtaking extensive ranges and patterns of surface coatings & beautification products. We have created countless moods and styles to home in various sizes and designs giving each its distinct look and feel, reflecting the house owner's unique personality and individuality. Our entrepreneurial spirit has made us the first of our kind with the largest range of products in the segment of decorative building material.

OUR MISSION

Our mission is "To achieve leadership position and become major player in decorative paint industry & architect recommendation products". According to our mission we have a team of professionals and technocrats to serve in the best way they can. As a result of constant growing we have the strong dealer and distributor network in PAN India and it is increasing continuously on timely basis. We have very diligent and professionally educated marketing team to control marketing and sales event.

Metal LINE

The Liquid Metal

Pure Industrial Stylet

"Filling" the spaces with furnishing and accessories is a fairly common and simple undertaking. Today we need to conceive and interpret the environment to support and enhance their purest architectural vocation, transforming them into spaces that are not only luxurious and refined, but also habitable, comfortable and practical. Add an elequence to almost any object by using the world class technology brought to you by luxture, "Luxture's Metal Line" Liquid Metal coatings are an ideal solution to seamless craft with metal. The material, composed almost entirely of real natural metal, retains the inherent properties of metal like texture, lustre, heat conductivity and reflection, once it's applied and polished. "Luxture's Metal Line" coating can be applied in numbers of finishes like textured, smooth & bespoke using stencils. "Luxture's Metal Line" now a hot choice of architects to bring an element of real metal to walls, furniture, home accesories, garden piece, etc which is not only luxurious but even durable & adaptable to atmospheric conditions.

"Luxture's Metal Line" is the first low and high thickness micro-coating for interior and exterior walls & furniture. Thanks to its chemical-physical characteristics, which allows to obtain the exact version of real metal with & without natural oxidation exposed to the elements in just a few minutes. Unlimited rust effect tones can be achieved by combining the various bases (Iron Oxidation, Iron with Copper, Copper with Aluminium or with Bronze, etc.) with over three varieties of activators. The natural chemical reactions, together with the various combinations possible mean that truly unique and individual results can be obtained.

General Features

"Luxture's Metal Line" is a decorative water-based system for indoor and outdoor use that allows you to create a real metal finish with variable natural oxidation.

What is LUXTURE'S METAL LINE

Authentic Metal finish with real metal components. "LUXTURE'S METAL LINE" is an interior/exterior decorative paint system consisting of a base, activator and protective coat, designed to achieve real metal finishes without and with rust effects.

Transform any paintable surface

"LUXTURE'S METAL LINE" combining the traditional art of patination with modern day paint technology, "LUXTURE'S METAL LINE" contains real metal particles

that will create the distinctive and timeless look of bronze and copper patina or the weathered appearance of rusted iron in a matter of minutes, on any paintable surface.

What you need to know

- Water based system ● Interior and exterior usage
- Real liquid metal ● Accelerated oxidation ● Unlimited applications ● Washable after full curing and protective coat application

Product Benefits

- Non fading ● Non peeling ● Scratch resistant ● Water resistant ● Durable ● Non-flammable ● Crack resistant ● Excellent adhesion ● Anti-fungal ● High flexural strength ● Low maintenance ● Seamless application possibilities

Industrial Touch In Any Setting

“LUXTURE'S METAL LINE” can be used by architects, interior designers, set designers, and home owners to add individuality to interior and exterior walls, architectural ornaments, or decorative elements such as gates, home accessories, garden pieces, electrical poles etc. Unlimited rust effect tones can be achieved by combining the various bases (Iron oxidation, Iron with Copper, Copper with Aluminium or with Bronze, etc.) with over five varieties of activators. The natural chemical reactions, together with the various combinations possible mean that truly unique and individual results can be obtained.

Product Details

Metal kit variants:	Bronze, Brass, Copper, Aluminium & Iron ● Shelf Life: 1 year after opening
Interior Grade Metals:	Bronze, Copper, Iron are best suited for interior surfaces
Exterior Grade Metals:	Aluminium and Oxidised variants of Bronze, Brass, Copper and Iron finally top coated with protective coating are best suited for exterior surfaces.
Suitable Base Substrates:	● MDF ● WPC ● ACP ● FRP ● SS ● MS ● Wood ● Glass ● Vinyl ● Acrylic ● Ceramics

M-Primer

Water based acrylic primers are best suited for the above mentioned base substrates, however for an MS and Cast Iron base, we would recommend a Zinc based primer.

Maintenance

The finishes can be maintained and cleaned by non-solvent based products and mild detergents only. We advise the use of a damp and dry cloth for regular cleaning, however avoid strongly acidic or alkaline solutions.

Recommended Use

“Luxture's Metal Line” Coating is highly recommended for smooth or self textured surfaces like walls, furniture, sculptures and facades. Avoid

Warnings

- Wear personal protective equipment such as goggles and gloves ● Avoid contact with eyes and skin
- Keep out of reach of children ● Read the safety data sheet before use

using the liquid metal finishes in wet and dripping areas to prevent any damage by excessive water. Kitchen tabletops and countertops should be avoided due to the high temperatures of objects and high usage of chemicals, oils, and potential staining ingredients such as turmeric. Restrict from using liquid metal finishes for flooring as well.

Instructions

- Protect from frost ● Mix thoroughly before application ● Do not apply on hot substrate
- Do not apply on damp walls ● Apply at temperature between +10°C and +30°C
- Protect marble, stones, glass, and painted parts
- After use, wash the tools thoroughly with water
- Store in a dry place away from frost and sun

LUXTURE'S®

Metal LINE

The Liquid Metal

Iron Antique Iron Effect Paint

Transform any surface into old oxidized iron. Extremely realistic to the touch, in the opacity and in non-homogeneous appearance. Thanks to chemical oxidation. The old rusty iron effect provides red, brown and orange rust spots of oxide with different shapes and sizes adjustable through application of the rust activator.

Our paint contains miniaturized and superficially passivated iron that are oxidized directly on the painted surface in order to obtain an old iron rust effect which is totally real. The result is obtained through the chemical oxidation of the paint and the use of high technology protective paints in order to produce artefacts with high resistance. It is possible, depending on application, to obtain an old iron rust surface more or less homogeneous. It depends particularly on the method of application of the rust activator solution.

Iron Paint kit

A new age solution with which you can achieve the authentic look & feel of real rusty iron metals in a matter of just few hour without going through the lengthy process of metal casting, fabrication and waiting a long to get oxidized naturally.

LUXTURE'S®

Metal LINE

The Liquid Metal

Bronze / Brass Fresh to Antique Bronze Effect Paint

Constituting the real metal in its formulation, the material preserves the inherent properties of real bronze. "Luxture's Metal Line"- Bronze gives the real lust of authentic bronze in its first age and at the other hand the lust can be transformed into an antique bronze with green patina effects in its older age that too in a matter of few hours. Transform any surface into new/old bronze. Extremely realistic to the touch, in the opacity and in non-homogeneous appearance. Thanks to chemical oxidation. The old bronze effect provides green and rust spots of oxide with different shapes and sizes adjustable through application of the patina activator.

It is a painting cycle that makes the product really new bronze as well as the surfaces can be turned into old oxidized bronze, with all corresponding nuances of color.

Metal LINE

The Liquid Metal

Copper Fresh to Antique Copper Effect Paint

Transform any surface into new / old oxidized copper. Extremely realistic to the touch, in the opacity and in non-homogeneous appearance thanks to the chemical oxidation. It is a painting cycle that makes the product really new copper as well as the surfaces can be turned into old oxidized copper, with all corresponding nuances of colour. Our paint contains miniaturized and superficially passivated copper which is oxidized directly on the painted surface in order to obtain an old copper effect that feels totally real. The old copper effect provides verdigris and rust spots of oxide of different shapes and sizes adjustable through application of the oxidant.

PATINA EFFECT Classic Effect is a decorative effect imitating the phenomenon of covering copper surfaces with patina. The combination of particular decorative mass and activating fluid enables the creation of patina effect on nearly all surfaces.
